REASON FOR ALLOWANCE

5. The following is an examiner's statement of reason for allowance:

The cited prior art taken alone or in combination fail to teach, in combination with the other claimed limitations, a method for determining, in a computer environment, an equivalence, if any, of two blocks of assignment statements in a computer program for use in compiler optimization of source code. The method comprising: processing in each array, during processing, if a variable appearing on left-hand side of an unprocessed assignment statement also appears on the right-hand side of the assignment statement being processed, replacing all occurrences of such variable on the right-hand side of the assignment statement being processed, non-recursively, by the right-hand side of the said unprocessed assignment statement; as recited in the independent claims 1, 6 and 7.
